# HT-KM POLE PRUNER

★★★★★ (68)

This STIHL KombiSystem pole pruner attachment makes quick work of pruning trees and shrubs.

When branches and shrubs need to go, slide the HT-KM pole pruner attachment onto your STIHL KombiMotor. This STIHL KombiSystem attachment features a side-access chain tensioner for easy chain adjustments. The oil tank cap features a retainer, so it stays put during refilling. The HT-KM attachment comes with a 12" bar and chain.

**NOTE:** STIHL KombiMotors and STIHL KombiSystem attachments are sold separately.

**I hate the 1/4' chain**

My older model uses the 3/8" chain that is much cheaper to buy and much easier to find and lasts much longer and....is so much better to sharpen. I hate the 1/4" pico chain it does not resharpen well and has very little metal to even resharpen. I own two other saws that use the awful 1/4" chain. Stihl needs to use serious chain. Oh one more thing the chain is so small it seems to bind up with pitch far too easily.

**Handy, effective tool**

The KM 94R along with chain saw attachment combination works as advertised. I've only used a couple times now, but it gets the job done to date for branches up to 6-7 inches. Watch the chain slack and the oil level. I don't have the

extension, but am over 6 feet tall and easily reach 9 foot high branches. You start feeling the weight after a while so the extension would make it heavier still. Have fun

**Pros:** Easy to Use, Easy to Maintain, Reliable

**DO NOT BUY THIS PIECE OF JUNK!**

I have owned a couple of the old style Kombi pole saws for at least the last 15 years and use them commercially, and they are excellent and have held up really well. I recently added another one to our fleet, the new left hand style, and I can't begin to say how disappointed I am with Stihl for how cheaply the new one is made. Didn't even make it one season before the gears stripped out and the gear case broke. Not to mention the lame plastic hook and overall cheap build, and the different size chain is a pain because it requires a different sharpening system than my other chains and doesn't cut as fast, and costs more. It is a terrible saw!!! I threw it in the dumpster because it's not worth fixing. I paid \$150 more for an old style one I found on Ebay and have no regrets other than I had to pay way more than it used to cost. Shame on you Stihl, you've really made a lot of old loyal users pretty upset.

**Cons:** Unreliable, Difficult to Use, Difficult to Maintain

**For the right use, it's great**

Although a little messy due to oil, this pruner can make short work of fairly large material. Have used on shrubs and deciduous and ornamental trees, and found it very useful attachment. A little heavy and has a tendency to "bounce" with the extension attachment.

**Pros:** Easy to Use, Easy to Maintain, Reliable  
**Cons:** Heavy

**Wow. Life just got a lot easier.**

I bought this pole saw attachment today. Spent 6 hrs pruning river birches that would have normally taking 2 days to do. What a GREAT TOOL. I own other stihl products and all are great but the ease of use is amazing! We will see where I am after a year but for today I'm GOOD. Would give 5 stars but that strap is AWFUL.
