

DROP HEAD THREADERS

EGA Master drop head threaders are specially designed for a precise operation, **due to the machining of the internal aluminium cap the four dies are aligned perfectly concentric to produce a consistently high quality thread.**

1. Designed for the easy production of high quality threads by hand.

2. The neck is longer, allowing a better positioning and reducing vibration to improve thread quality and helping with the removal of the ratchet head.

3. Includes a range of head sizes covering all requirements.

4. Die sets are available for BSPT, NPT and BSPP threads.

TECHNICAL SPECIFICATIONS

MATERIAL	HEADS	Body	Malleable cast iron
		Cap	Aluminium
		Dies	Special steel
HARDNESS	RATCHET ADAPTOR		Aluminium alloy
	DIES		Aluminium
	RATCHET HEADS		58-62 HRc
FINISHING	RATCHET HEADS		45-50 HRc
	RATCHET		Painted in Epoxi powder black matt color semi-texturized
			Painted in Epoxi powder red color ral-2002 semi-texturized
