MAGNETIC BASE

By far the most popular feature of our 3AA LIGHTHOUSE is the magnetic base which can be mounted mounted on a metal work area, but also stood up on any flat surface in order to illuminate your task while leaving your hands free to get the job done. Perfect for auto body work, electrical, utility or just everyday use.

RALS LIGHTING

Multiple Lighthouse lights provide shadow-free RALS lighting for your work area.

ADJUSTABLE HEAD

The adjustable head can be rotated 360° or tilted up and down 120°. The tilt angle can be locked by tightening the knob on the side of the 3AA LIGHTHOUSE, so that the adjustable head remains in position and shines exactly where you want it.

RIGHT ANGLE LIGHTS

Many firefighters use right angle lights as their hands-free device, or as trusted backup lights. They can be mounted to the bunker coat or tied to the shoulder strap. The 3AA LIGHTHOUSE can rotate in any direction, giving you ability to see in front of you whether you are walking or crawling.
