

Any pneumatic machine without built-in lubrication needs a separate lubricator to ensure that all moving parts are continuously covered with a film of oil.

Common Characteristics

- For secure oil supply
- For reliable functionality in all working positions
- For trouble-free ownership
- For longer lifetime
- For protected investment

Technical Data

| Parameter | Value |
|------------------------|----------|
| Weight | 3 kg |
| Volume | 1.3 l |
| Air flow | 15-140 l |
| Hose internal diameter | 25 mm |
