

# WRENCHES 1000V

EGA Master insulated tools comply with IEC 60900 international standard, each one of the pieces being tested at 10,000V (10 times the voltage we certify). They are also tested rigorously according to what the norms establishes: adherence test, impact test, flame propagation test and dielectric penetration test.

 **1.000V**  
IEC 60900

## MAIN APPLICATION FIELDS

Electrical installation	High Voltage networks	Electric maintenance
Power Plants	Low Voltage networks	Fire-fighters
Electric Stations and substations	Telecommunications	Lighting installation and repair

## CAUTION

- 1 Don't ever use tools under voltage if they present pores, fissures, encrusted elements or if the white insulation layer is visible.
- 2 Insulating floors and safety shoes are recommended to work under voltage.
- 3 Avoid contact with water while working under voltage.
- 4 Do not ever touch directly any item that may be under voltage. Use a voltage tester to check first.

# WRENCHES 1000V

EGA Master offers a wide range of isolated 1000V wrenches to meet the needs of all professionals; single ended open jaw spanner, offset ring wrench, angled open sockets, T handle wrench, cross rim wrench, hexagonal wrenches...  
**Ega Master's 1000V insulated wrenches offer safety for the user in electrical work.**

**both in mm and inches**

 **1.000V**  
IEC 60900

**1.** Designed for work under electricity tension or in proximity of the voltage installations.

**2.** Available sizes up to 50 mm and 1.1 / 4 ".

**3.** PVC insulation provides maximum adherence and safety against possible contingencies.

**4.** Un-erasable laser marking.
