

QF4 - QF4W WIRE FEEDER

ONLY FOR QUBOX AND QUBOX PULSE

QF 4 AND QF 4W WIRE FEEDER

QF4-QF4W proposes main selection and control keys of wire-feeder and power source. The available 2 independent displays, feeder plus power source, provide the possibility of contemporarily visualizing and monitoring 2 different parameters at the same time. This wire feeder have to be plug only to all QUBOX or QUBOX PULSE series.

- Professional wire feeding mechanism with 4 rolls of large diameter for a precise and constant wire driving
- Graduated knob to achieve the most correct value of the wire pressure, which remains unchanged also after any arm opening and closing
- Double groove rolls replaceable without any tool
- Lodging for wire spools up to 300 mm diameter maximum

TECHNICAL DATA		QF4 - QF4W
Three phase input 50/60 Hz	V	24 DC
Motor power	W	100
Rolls	No.	4
Feeding speed	m/min	1,5 - 25
Solid wire (steel)	Ø mm	300
Spool Weight	Kg	20 MAX
Dimensions	↗ mm	635
	→ mm	415
	↑ mm	270
Weight	kg	15

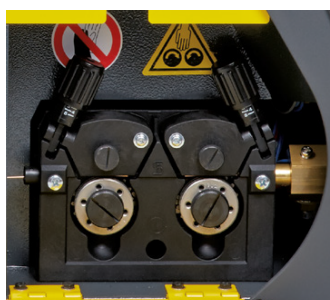

QF4-QF4W and QUBOX equipment in the air cooled version offer the possibility of utilizing up to 40 m-long interconnecting cables from the power source to the feeder.
