

# WP805635A Welding goggles Amigo

## Technical information

|                                 |                                                                                                                                                                                                                             |
|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Part number                     | WP805635A                                                                                                                                                                                                                   |
| Unit                            | Each                                                                                                                                                                                                                        |
| Specifications                  | <ul style="list-style-type: none"><li>- Interchangeable lenses</li><li>- Can be worn over normal glasses</li><li>- Switch quickly between welding and grinding</li></ul>                                                    |
| Benefits                        | <ul style="list-style-type: none"><li>- Scratchproof</li><li>- UV protection</li><li>- Antistatic</li></ul>                                                                                                                 |
| Application                     | <ul style="list-style-type: none"><li>- Open flame welding</li><li>- Soldering and all torch cutting tasks</li></ul>                                                                                                        |
| Properties                      | <ul style="list-style-type: none"><li>- Soft and flexible vinyl frame (EN 175)</li><li>- Flip-up welding goggles (clear polycarbonate lenses below)</li></ul>                                                               |
| Technical information           | <ul style="list-style-type: none"><li>- Lens diameter: 50 mm</li></ul>                                                                                                                                                      |
| Commercial Supplier Information | <p>Long description<br/>AMIGO SHADE 5 LENSES</p> <p>Features<br/>Welding goggle with soft flexible vinyl frame and 50mm round green shade no.5 flip front lens.Can switch from welding to chipping for easy inspection.</p> |
| Lens frame material             | PVC                                                                                                                                                                                                                         |
| Material                        | Polycarbonate                                                                                                                                                                                                               |

|          |                |
|----------|----------------|
| Coating  | 3A             |
| Norm     | 5 EN 166 1S CE |
| Standard | EN175          |
| Type     | Xanthos No. 5  |
| Weight   | 125 g          |

Accessories (2)

**WP618810**  
Welding goggles Amigo strength 10  
**Quantity** 1

**WP79005**  
Welding glass round ø50mm colour 5  
**Quantity** 1
